Stephen:

You should go ahead and get the manifests from Texas Molecular. They will be needed for the Removal Action Closeout report that will be prepared.

Thanks

I'll have the weekly update to you soon.

As far as records go we have all the documentation except the manifests of water that we sent to Texas Molecular (TM). I have verified with TM that if the manifests were needed they could supply copies.

Stephen:

Any idea where the weekly is at?

Also, I have a fear that you have not been retaining records associated with the site that go back to BNC, Kleinfelder days. I need to get confirmation that you have retained those documents for your client (NORCO) and now Lazarus. Those documents are required to be maintained and organized to be able to provide to EPA at anytime requested. Please confirm that this is being done.

Thanks

which may be a computer program. This attached computer
program could
contain a computer virus which could cause harm to EPA's
computers,
network, and data. The attachment has been deleted.

This was done to limit the distribution of computer viruses introduced into the EPA network. EPA is deleting all computer program attachments sent from the Internet into the agency via Email.

If the message sender is known and the attachment was legitimate, you should contact the sender and request that they rename the file name extension and resend the Email with the renamed attachment. After receiving the revised Email, containing the renamed attachment, you can rename the file extension to its correct name.

For further information, please contact the EPA Call Center at (866) 411-4EPA (4372). The TDD number is (866) 489-4900.
